Attention Everyone at the Environmental Studies Building,

Entry/Exit management system has been operated at all 5 entrances of the Environmental Building to manage all entries and exits.

Thank you so much for your understanding and cooperation.

In view of the fact that the measures related to COVID-19 control have been developed in the University and society, it has been decided to terminate the operation of the system as of September 30, 2022.

I ask you to continue taking basic precautionary measures to prevent the spread of COVID-19 and to promote education and research activities.

Thank you very much for your attention and cooperation.

Chair, Division of Environmental Studies
Professor Shin'ichi Warisawa
